

ARRA financial incentives drive demand for VisualMED smart EHR

Medical facilities sign agreements worth \$2.6 million

LAS VEGAS, NV, June 28th 2010 – VisualMED Clinical Solutions Corp. (The “Company”) (NASDAQ OTC: VMCS.PK) (Frankfurt: VA6.F) announces that it has received in the past three weeks firm orders for its Clinical Information System from independent private medical facilities worth an aggregate amount of 2.6 million.

The deals are multi-year rental agreements that will see the deployment of the Company’s signature smart Electronic Health Record, with full CPOE, decision support and medical alerts, over the next 3 months. A significant part of the implementation support and help desk will be outsourced for greater speed and efficiency.

Starting in April the Company has been receiving increasing requests for quotes as medical facilities seek to meet the 2011 deadline for the first and largest disbursement to physicians under ARRA provisions. The key for physicians to secure these payments is meeting the *meaningful use* criteria which can only be demonstrated by using a true intelligent CPOE such as the ones VisualMED has been offering for many years.

“Thanks to the new reforms our time has come,” says Chairman Gerard Dab. “We are now becoming a mainstream product line that helps physicians meet new regulatory standards. Providers have only five years to implement systems that offer meaningful use before they face punitive measures, and there is a shortage of expertise in the marketplace to do so.”

VisualMED appears to be benefiting from the new regulatory environment created by the Healthcare Information Technology provisions of the American Recovery and Reinvestment Act (ARRA), which has earmarked close to \$40 Billion to promote the widespread adoption of systems that correspond to federal norms of *meaningful use*, such as those owned and marketed by the Company since 2006.

Medical institutions are under increasing pressure to adopt such technologies. There is an industry-wide rush to identify systems that can help physicians qualify for federal ARRA reimbursement grants. This has led to an increased demand for products and services from companies that can deliver the rich medical content and suitable interoperability required.

The Company continues to work with its network of licensees and will seek to expand its network of strategic alliances. It expects to be profitable for a second consecutive year and has continued to contain operating costs.

ABOUT VISUALMED

VisualMED markets smart EHR with Clinical Information Systems (CIS) and Computerized Physician Order Entry that meet the new regulatory environment ushered in by the American Recovery and Reinvestment Act of 2009 and the Health Reform Act of 2010.

We offer a powerful technology platform both scalable and interoperable, developed at a cost of some forty million dollars and tested over many years in tertiary care and ambulatory environments.

Our solutions help medical facilities reduce mortality and morbidity due to medical errors, increase provider efficiency and bring down operating costs. Their key clinical components are a core solution in the new agenda to promote greater patient safety and reduce risks due to medication errors.
